

CLAIMS

I, Pamela Elizabeth Dalton claim as my invention the textured bottom surfboard, that I have titled the "Zero Resistance Surfboard" for use on the surface of water in the sport of surfing, or riding ocean waves.

I believe that the improved movement, and enhanced performance of the surfboard on the surface of water is my sole idea, and that the protections of a granted patent of my invention of the embedding of a raised textured surface on the water contact areas of surface water sporting equipment should be granted to me for further development of a product with commercial potential.

I respectfully thank you for your kind attention.

Sincerely, 

Pamela Dalton
